Chapter 1

practice-project-1

Practive Project – Demonstrates usage of CMake, Doxygen, git and Travis CI. Also, serves as a guide for C++ projects with emphasis on modern C++.

Sublime Useful Packages

Download sublime text from their website, it will be a .deb. Then run in terminal using `subl`.

Preparing the Documentation

```
mkdir docs
cd docs
doxygen -g
doxygen Doxyfile
# Making pdf documentation from LaTeX files
cd latex
make
```

I have also included the pdf documentation in the root directory for reference and also I am not cleaning the build files as I assume Doxygen might not be installed on the evaluaters systems. If you feel comfortable in the html documentation, open this webpage `$PROJECT_ROOT/docs/html/index.html`.

Also, I kept the flag `ON` to build documentation with static members and all the member functions and variable for the sake of clarity.

Packages to install

- [DoxyDoxygen](#) – Documentation
- [Anaconda](#) – Python Autocomplete etc.
- [EasyClangComplete](#) – C++ Autocomplete.
- [GitHub Flavored Markdown Preview](#) – Markdown Preview

Chapter 2

Namespace Index

2.1 Namespace List

Here is a list of all documented namespaces with brief descriptions:

| | |
|------------------------------|-------------------|
| pp | 7 |
|------------------------------|-------------------|

Chapter 3

Class Index

3.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

| | |
|---|---|
| pp::Calculator< T > | |
| Class for calculator | 9 |

Chapter 4

Namespace Documentation

4.1 pp Namespace Reference

Classes

- class [Calculator](#)
Class for calculator.

4.1.1 Detailed Description

pp is `practice-project-1` workspace.

Chapter 5

Class Documentation

5.1 pp::Calculator< T > Class Template Reference

Class for calculator.

```
#include <calculator.h>
```

Public Member Functions

- [Calculator](#) ()
Constructor.
- [T add](#) (T a, T b)
Perform additions.
- [T subtract](#) (T a, T b)
Performs subtraction.
- [T mul](#) (T a, T b)
Performs multiplication.
- [T divide](#) (T a, T b)
Performs division.

5.1.1 Detailed Description

```
template<typename T>  
class pp::Calculator< T >
```

Class for calculator.

Template Parameters

| | |
|----------|-----------------|
| <i>T</i> | Template Class. |
|----------|-----------------|

5.1.2 Constructor & Destructor Documentation

5.1.2.1 Calculator()

```
template<typename T >
pp::Calculator< T >::Calculator ( )
```

Constructor.

Template Parameters

| | |
|----------|-----------------|
| <i>T</i> | template class. |
|----------|-----------------|

5.1.3 Member Function Documentation

5.1.3.1 add()

```
template<typename T >
T pp::Calculator< T >::add (
    T a,
    T b )
```

Perform additions.

Parameters

| | | |
|----|----------|------------------|
| in | <i>a</i> | parameter↵ _1 |
| in | <i>b</i> | parameter↵ _2 |

Template Parameters

| | |
|----------|-----------------|
| <i>T</i> | template class. |
|----------|-----------------|

Returns

sum of a and b.

5.1.3.2 divide()

```
template<typename T >
T pp::Calculator< T >::divide (
    T a,
    T b )
```

Performs division.

Parameters

| | | |
|----|----------|------------------|
| in | <i>a</i> | parameter↔ _1 |
| in | <i>b</i> | parameter↔ _2 |

Template Parameters

| | |
|----------|-----------------|
| <i>T</i> | template class. |
|----------|-----------------|

Returns

division of a and b.

5.1.3.3 mul()

```
template<typename T >
T pp::Calculator< T >::mul (
    T a,
    T b )
```

Performs multiplication.

Parameters

| | | |
|----|----------|------------------|
| in | <i>a</i> | parameter↔ _1 |
| in | <i>b</i> | parameter↔ _2 |

Template Parameters

| | |
|----------|-----------------|
| <i>T</i> | template class. |
|----------|-----------------|

Returns

multiplication of a and b.

5.1.3.4 subtract()

```
template<typename T >
T pp::Calculator< T >::subtract (
    T a,
    T b )
```

Performs subtraction.

Parameters

| | | |
|----|----------|------------------|
| in | <i>a</i> | parameter↔ _1 |
| in | <i>b</i> | parameter↔ _2 |

Template Parameters

| | |
|----------|-----------------|
| <i>T</i> | template class. |
|----------|-----------------|

Returns

multiplication of *a* and *b*.

The documentation for this class was generated from the following files:

- calculator.h
- calculator.cpp
